

Google Ads API Tool — Design Document

PropertySG (30 Thousand days) · joetay.com · Singapore · September 2026

1. Business model

Joe Tay is a CEA-registered property salesperson and District Director with ERA Realty Network Pte Ltd, operating the residential property advisory site **joetay.com**. The business publishes HDB resale price data, new-launch project records, and buyer/seller guides for the Singapore market, and generates client enquiries through those pages. Revenue comes from property brokerage commissions. We are an **advertiser spending our own budget on our own campaigns**. We are not an agency, we do not manage advertising for third parties, and we do not resell software or data.

2. What the tool is

A command-line reporting script (`google_ads_report.py`, ~200 lines of Python) that retrieves performance statistics for our own Google Ads account and prints them as a table, CSV, or JSON. It exists to replace manual copying of figures out of the Google Ads web interface into our own records.

It is **strictly read-only**. It issues no mutate operations of any kind. It cannot create, edit, pause, or delete campaigns, budgets, ads, keywords, or bids. Those actions continue to be performed by hand in the Google Ads UI.

3. Accounts in scope

Manager account (MCC)	948-996-2292
Operating account	435-311-8591
Google Cloud project	JoeTay Ads API — number 728370309631

Both accounts are owned and paid for by us. No external or client accounts are accessed.

4. API usage

A single service and a single report are used:

Service	GoogleAdsService.SearchStream
Resource	campaign
Call volume	1–2 requests per run; run manually, or at most once daily by cron

The exact GAQL query issued is:

```
SELECT campaign.id, campaign.name, campaign.status,
       campaign.advertising_channel_type, campaign_budget.amount_micros,
       metrics.impressions, metrics.clicks, metrics.ctr, metrics.average_cpc,
       metrics.cost_micros, metrics.conversions, metrics.conversions_value,
```

```

    metrics.cost_per_conversion, metrics.search_impression_share,
    metrics.search_budget_lost_impression_share
FROM campaign
WHERE segments.date BETWEEN '{start}' AND '{end}'
ORDER BY metrics.cost_micros DESC

```

No other resources, services, or reports are queried.

5. Why we need it

Our single active campaign (*Search - HDB Seller - Singapore*) is capped at SGD 20/day and is flagged "Limited by budget" in the UI. We need `search_budget_lost_impression_share` tracked over time to decide, on evidence, whether raising that cap is justified. The web interface shows this only as a snapshot; we need the trend recorded alongside cost per conversion, which recently improved from roughly SGD 190 to SGD 64.

6. Users and access

Internal only — one person. The tool runs locally on the business owner's own Mac, from the command line. There is no web interface, no hosted service, no login, and no multi-tenancy. No employee, contractor, client, or member of the public has access. No Google Ads data is displayed to, transmitted to, or shared with any third party.

7. Credential and data handling

- OAuth client type **Desktop app**, consent screen audience **Internal** to the joetay.com Google Workspace organisation.
- Developer token, OAuth client secret and refresh token are held in a local `.env` file, excluded from version control via `.gitignore`.
- Retrieved figures are printed to the terminal or written to a local file. Nothing is uploaded, published, resold, or shared.
- No personally identifiable information is retrieved; the query returns campaign-level aggregate metrics only.

8. Sample output

Rendered from figures for our own account:

Google Ads 4353118591 | 2026-08-07 to 2026-09-05

Campaign	Status	Impr.	Clicks	CTR	Avg CPC	Cost	Conv
Search - HDB Seller - Singapore	ENABLED	2,852	170	5.96%	3.39	576.59	9.0
Search - Condo Seller - Singapore	PAUSED	0	0	0.00%	0.00	0.00	0.0
SG Property Valuation	PAUSED	0	0	0.00%	0.00	0.00	0.0
TOTAL		2,852	170	5.96%	3.39	576.59	9.0

Change vs previous period

Impressions	-6,207	(-68.5%)
Cost	-940.37	(-62.0%)

Conversions	+1.00	(+12.5%)
Cost / conv.	-125.55	(-66.2%)

9. Compliance

- Not used with any tool developed by another party.
- Not used for the App Conversion Tracking and Remarketing API.
- No Google Ads data is shown to external parties, so required-minimum-functionality obligations for third-party interfaces do not arise.
- Rate limits are respected; usage is a handful of requests per day at most.
